NocoSpray is a complete sporicidal, disinfection technology without the use of harmful chemicals. Developed in France by Oxy'Pharm. NocoSpray is a revolutionary technology destroying 99.9% of all harmful bacteria, viruses, fungus, moulds and yeasts. Based on Hydrogen Peroxide (H₂O₂) and a catalyst, it leaves no residues and requires far less labour.

In many clinical studies, Hydrogen Peroxide Vaporisation (HPV), has been proven to have higher efficacy than normal liquid Hydrogen Peroxide and Chlorine Bleach on most organisms. NocoSpray technology is HVP and has proven sporicidal properties against Mould, Fungus and Yeasts where the liquids do not.

NocoSpray is the perfect solution to increase cleaning services in unlimited ways
