NocoSpray: The Perfect Solution for Cruise Ship Disinfection

NocoSpray by **equipmed**

Making your Environment Safer
Total surface and air disinfection

NocoSpray
Can also treat:

- ✓ Food Protection
- ✓ Bed Bugs
- ✓ Mould

NOCOSPRAY

The Perfect Solution for Cruise Ship Disinfection -

Protect your staff, visitors and destinations:

- ✓ Quick and easy way to obtain Total Air and Surface Disinfection inside the ambulance including the air vents of the air conditioning.
- ✓ NocoSpray is a totally dry particle, that means there is no requirement for further wipe down of the surfaces after disinfection.
- ✓ The vapour will penetrate all surfaces inside the cabin or area including places that would be too difficult to clean manually, without removing fixtures.
- ✓ There is no need to remove anything from the room before disinfection. As the vapour is non corrosive, it will not damage any equipment within the ambulance and has been certified for use within various modes of medical transport including helicopters and planes.
- ✓ The NocoSpray has been approved for use within operating theatres, cruise ship, restaurants, aged care facilities along with many other industries.
- ✓ NocoSpray is CASA approved to be used in aircraft, so that cruise liners may be disinfected in the same way.

NocoSpray Technology is a complete disinfection technology, without the use of harmful chemicals, that destroys 99.999% of all harmful bacteria, viruses, fungus, moulds and yeasts. NocoSpray is a system of delivering MICRO-FINED NOCOLYSE (H₂O₂) ions to the surface of harmful micro-organisms. When delivered, new compounds are formed, which induce the micro-organism to self destruct, poisoned on their own chlorine. Nocospray leaves no residue, is non corrosive, CASA approved for use in aircraft and is 99.99% bio-degradable within minutes, breaking down into ions of air and water.

NocoSpray Total Surface and Air disinfection is the answer to the ever rising threat of the SUPERBUGS, and other exceptionally transmittable organism, such as flu, gastro and virus.

The perfect solution for Cruise Ship Disinfection.
